A: Security Command Center is Google Cloud's comprehensive security and risk management tool. It provides security analytics, vulnerability scanning, and threat detection to help organizations secure their cloud infrastructure, applications, and

analytics, vulnerability scanning, and threat detection to help organizations secure their cloud infrastructure, applications, and data. The Security Command Center enables visibility across the organization's assets in the cloud, identifies vulnerabilities and misconfigurations, and recommends corrective actions to enhance security. This tool is particularly valuable for continuous monitoring, compliance reporting, and gaining insights into potential security threats.
