EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 22 DISCUSSION

Actual exam question from Google's Cloud Digital Leader
Question #: 22
Topic #: 1
[All Cloud Digital Leader Questions]

Your organization is building an application running in Google Cloud. Currently, software builds, tests, and regular deployments are done manually, but you want to reduce work for the team. Your organization wants to use Google Cloud managed solutions to automate your build, testing, and deployment process.
Which Google Cloud product or feature should your organization use?

A. Cloud Scheduler

B. Cloud Code

C. Cloud Build

D. Cloud Deployment Manager

Selected Answer: C

Cloud Build is a fully managed CI/CD platform that automates the build, test, and deployment of your applications. It provides a reliable and scalable infrastructure to compile source code, run unit tests, and package artifacts for deployment. Cloud Build integrates with popular source code repositories like GitHub and Bitbucket, allowing you to trigger builds automatically on code changes or schedules.
