Selected Answer: C

A. Cloud Build - serverless
B. Cloud Run - container
C. Compute Engine - VM/instance
D. App Engine - platform as a service

Selected Answer: C

Read the question properly, "Wants full control of their VM infrastructure for their custom app", this answer should be seriously easy, how can you say B or any other option, the only option here is C, Compute Engine will allow you to have full control of their VM infrastructure and you can autoscale and also apply automatic updates.

Selected Answer: C

C is correct

upvoted 1 times

__rajan__ 1 year ago

Selected Answer: C

C is correct as the organization wants full control of their virtual machine infrastructure.

TBH - It could be both C or D - the question is badly worded...
C is right if the first part of the question is read "An organization wants full control of their virtual machine infrastructure"
However, D is also right for the latter part of the question "...for a custom home-grown application with a product that autoscales and automatically updates" as App engine does autoscallng and updating, whereas Compute engine (C) does NOT BY DEFAULT.

Answer is C
A. Cloud Build - containers
B. Cloud Run - serverless
C. *Compute Engine - (VM) instances *
D. App Engine - serverless

Selected Answer: C

GCE, as all other options don't allow full control

upvoted 1 times

grzeev 2 years ago

Selected Answer: D

they start with control vm infra, but end with app that needs to scale

Selected Answer: C

C. Compute Engine is the only option that makes sense

upvoted 1 times

zellck 2 years, 1 month ago

Selected Answer: C

C is the answer as compute engine will allow full control of the VM infra.

all_cloud 2 years, 1 month ago

Selected Answer: B

Answer is cloud run, which autoscales

upvoted 1 times

moi23 1 year, 8 months ago

It's C, you need full control to satisfy the "homegrown" keyword
