EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 94 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 94

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

Why do organizations often struggle to scale their on-premises application infrastructure?

- A. Scaling compute instances could breach compliance and/or regulation
- B. Increasing compute capacity is time-consuming and costly
- C. Their serverless compute functions struggle to meet the demand
- D. Their multi-cloud architecture is complex and expensive

Selected Answer: A

In large organizations, there are people involved across multiple functions. Technology and line-of-business teams are often using cloud resources, but they don't necessarily factor cost into their decision-making. Finance teams control cloud costs, but may struggle to understand or to keep up with cloud spend on a daily, weekly, or monthly basis.
