EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 99 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 99

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization wants to add a new function to their application. They want to write the code and let the public cloud provider handle the infrastructure.

Which infrastructure solution should they use?

- A. Virtual machines
- B. Bare Metal Solution
- C. Serverless computing
- D. Container Registry

Selected Answer: C

To add a new function to their application, the organization can use the serverless computing platform offered by their public cloud provider. For example, they could use AWS Lambda, Google Cloud Functions, or Azure Functions.

The organization should use serverless computing as the infrastructure solution to add the new function to their application.

Selected Answer: A

My choice is A; Because "wants to add a new function to their application". Using VM is more appropriate For Serverless Computing - the organization needs to fully migrate the application - not just add a new function alone

VM is a IaaS, this itself will put A as a wrong choice as infrastructure is to be handled by cloud, not user- hence no IaaS

"to write the code and let the public cloud provider handle the infrastructure" I think this is the definition of serverless technology.

C : Serverless Computing. They have to write a function. So use Cloud Functions which is Serverless computing.

Selected Answer: C

C. Serverless computing

👍 ↩ 🚩 upvoted 1 times

🗄️ 👤 **Ashish_01** 2 years, 1 month ago

Selected Answer: C

C is the correct answer. Virtual machines are IaaS in which user have to manage the infra.

👍 ↩ 🚩 upvoted 4 times

🗄️ 👤 **MGSS** 1 year, 10 months ago

IaaS - Infra as A Service , as a user what Infra do you manage, its managed by Cloud Provider. You just get ur required software installed for coding purpose.

Selected Answer: C

c es la correcta

   upvoted 1 times

  **Kamlakar** 2 years, 1 month ago

Serverless computing , as public cloud prouder(eg. google) will mange the infra things . hence C .

   upvoted 1 times

  **Vin1975** 2 years, 1 month ago

C. Serverless computing

   upvoted 1 times

  **soumik4u** 2 years, 1 month ago

Why the option is not C. Serverless Computing rather than A. Virtual Machines.

Admin please review and correct the answers with proper description.
