EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 129 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 129

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

How can a streaming service meet global compliance requirements using the cloud?

- A. By automatically encrypting personally identifiable information
- B. By obtaining a business license to operate in a new market
- C. By allowing users to disable two-factor authentication
- D. By adhering only to data policies of the country in which the head office is registered

i initially thought B but after research I concur that the answer is A

Explanation:

Refer - <https://cloud.google.com/blog/products/networking/benefits-of-building-media-services-on-google-cloud>.

This is not referring to default data encryption stored in Google cloud storage. This refers to "enhanced end-to-end encryption using Digital Rights Management (DRM)"

Isn't all data in the cloud encrypted at rest - "All data that is stored by Google is encrypted at the storage layer using the Advanced Encryption Standard (AES) algorithm, AES-25". So it can't be A, because this already happens right?

A is the answer. D says about the headquarter but the importance of data should be from where its collected.

Selected Answer: C

Hey people the question it self is wrong. This should be Which of the following is NOT a way that a streaming service can meet global compliance requirements using the cloud?" And the answer should be C because least of 3 options need streaming service.

Selected Answer: A

business licences are granted by the local governments and not by the cloud provider.

Option B: Encrypting PII complies with security compliances, but to go global, one needs to have a licence obtained to operate in the new market for streaming dataflow.

ed_per 1 year, 11 months ago

Selected Answer: A

D doesn't make sense. It needs to comply in all countries it's operating in. not just where the head office is.

D doesn't make sense. It needs to comply in all countries its operating in, not just where the head office is.

Selected Answer: A

A. Others don't seem valid. Certainly not D as the service needs to comply with local regulations too.
