EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 161 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 161

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization is struggling to keep up with the growth of their application which is running on legacy infrastructure.

What might be holding them back?

- A. The time it takes their serverless compute function to scale
- B. The overreliance on platform as a service
- C. The inaccessibility of their data due to perimeter security
- D. The cost of provisioning hardware for peak usage

The option that is most likely holding the organization back in keeping up with the growth of their application which is running on legacy infrastructure is option D, the cost of provisioning hardware for peak usage.

Legacy infrastructure is typically based on on-premises hardware that is managed and maintained by the organization. As the application grows and the user base expands, the hardware required to support it must also grow. This can lead to significant costs associated with provisioning and maintaining hardware, particularly if the organization needs to provision for peak usage.
