EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 171 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 171

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

A retail organization has moved all of their inventory data to a relational database in the cloud.

What functionality does a relational database offer?

- A. It stores large amounts of raw data in its original format
- B. It stores transactional data, which can then be accessed electronically
- C. It rapidly analyzes large and multi-dimensional datasets
- D. It analyzes unstructured data, which can then be accessed in multiple regions

Selected Answer: B

A relational database offers the functionality of storing transactional data, which can then be accessed electronically. Relational databases store structured data that can be organized in tables with defined relationships between them. This makes them well-suited for transactional data, such as inventory data, that needs to be accessed and updated frequently.
