EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 98 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 98

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization recently launched a virtual customer support agent, generating vast amounts of text and speech data. Why should they use a cloud data warehouse to interpret this data?

- A. To natively visualize both types of data using a dashboard in real time
- B. To ingest and analyze structured and unstructured data at scale, in real time
- C. To secure data transmission between cloud and on-premises environments
- D. To transform data from structured to unstructured

This one threw me. I wouldn't associate "unstructured data" with a data warehouse. The phrasing of this one is very confusing. I'm not sold on B being the answer.

Selected Answer: B

Data warehouses assemble data from multiple sources including databases. An enterprise data warehouse is a system used for the analysis and reporting of structured and semi-structured data from multiple sources.

Selected Answer: B

A could have been a valid answer, but one can do a lot more than just visualize.

Selected Answer: B

B. Real-time data ingestion and updates. A simple and universal solution for continually ingesting your enterprise data into popular cloud-based data warehouses in real time.
