EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 168 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 168

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization has started to develop cloud-native applications to replace their legacy applications.

What else should the organization do to adopt the cloud?

- A. Provide privileged cloud network access to third-party partners.
- B. Migrate some of their legacy infrastructure to the cloud.
- C. Conduct maintenance on their legacy hardware.
- D. Increase CapEx on existing projects.

Selected Answer: B

B is the answer

   upvoted 1 times

  **73301d1** 2 months ago

Selected Answer: C

C is the most logical answer

A. As the Question stated " what else should the organization " which means that it is a must do which here I might not need to provide access to third party.

B: doesn't make sense to migrate infrastructure to the cloud?!?

D : doesn't make sense to increase CapEx

C is correct!

Since the organization has started to develop "cloud-native" applications to replace their legacy applications, I suppose the keyword is: "Cloud-Native". So I'd exclude the answer B as you do not migrate an on-prem infrastructure to the cloud. I exclude also answer D, as you want to maintain legacy infrastructure expenditures, not increase them. I exclude also A: why do you need provide privileged cloud network access to third-party partners? It does not make sense.

You want to maintain your existing legacy hardware until you finish developing new cloud-native applications

B.

Migrating legacy infrastructure to the cloud is a common and feasible practice. Cloud migration offers several benefits, including increased scalability, flexibility, cost savings, and improved performance.

I think the Answer is A. what is the benefit of migrating LEGACY infrastructure to the cloud. You, however may need to connect to 3rd parties, say MasterCard or Visa for your application to work.

Selected Answer: A

I don't think that B is correct as normally you do not migrate infrastructure to cloud. Even the lowest level of cloud adoption is about renting infra from cloud provider.

I don't like any of the answers, but the A is the only meaningful for me.
