Selected Answer: A

I believe A and D are correct but I would say A because that is how most of Google Services allow you to define the privacy by restricting data access or sharing policies

by restricting data access or sharing policies.

To me this is a general question, not just Google. Privacy defined by compliance standards makes more sense. A seems to be a general response to restrictions on data not specific to cloud technology.

Selected Answer: A

A. Restrictions on data access and sharing

Privacy in the context of cloud technology is the protection of personal data from unauthorized access, use, or disclosure. This includes the right to control who has access to your data and how it is used.

Selected Answer: A

What is Privacy? Privacy, in the context of cloud technology, refers to the data an organization or an individual has access to and who they can share that data with.
