## EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 50 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 50

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

How should a multinational organization that is migrating to Google Cloud consider security and privacy regulations to ensure that it is in compliance with global standards?

- A. Comply with data security and privacy regulations in each geographical region
- B. Comply with regional standards for data security and privacy, because they supersede all international regulations
- C. Comply with international standards for data security and privacy, because they supersede all regional regulations
- D. Comply with regional data security regulations, because they're more complex than privacy standards

**Selected Answer: A**

For a multinational organization migrating to Google Cloud is to comply with data security and privacy regulations in each geographical region where it operates. This ensures compliance with local laws and regulations specific to each jurisdiction. Different regions may have their own set of data protection and privacy standards that organizations need to adhere to.
