  **jaxclain** 2 years, 1 month ago

Selected Answer: C

Correct answer is C all the way, first the option A is wrong (you cannot have 100% service availability) you need to watch the video guides from Google and it mentions that one of the benefits is exactly that devs will have new tools to innovate more so is the only answer that makes sense here, B and D are not benefits at all.

Selected Answer: C

A. They can expect 100% service availability. - incorrect since it's impossible to achieve true 100% availability.

C. They can have new tools to innovate and optimize resource usage. - correct. Google cloud have vast majority of products/tools that you can use to innovate. Additionally, there are products in google that scale automatically based from usage (Ex. App Engine, Cloud Run, etc.)
