EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 146 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 146

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization is moving away from an on-premises infrastructure. Instead, they want to create, access, and share information virtually in the cloud.

What should the organization consider?

- A. Built-in security when moving their data to the cloud
- B. Replacing their perimeter security with data encryption keys
- C. Optimizing cost-management with a capital expenditure model
- D. Increased hardware capacity when moving their data to the cloud

B would be my choice;
Choice A is a given & comes with the cloud model
Therefore, Choice B is something any organization should consider

Selected Answer: A

A. Built-in security when moving their data to the cloud

When moving from an on-premises infrastructure to the cloud, security is a top priority. The organization should consider the built-in security features offered by the cloud provider, as well as their own security requirements.

Selected Answer: A

To help protect your data, Google encrypts data at rest, ensuring that it can only be accessed by authorized roles and services, with audited access to the encryption keys.
