D: Firestore (formerly known as Cloud Firestore) is a highly scalable, serverless, NoSQL document database built for automatic scaling, high performance, and ease of application development. It provides powerful querying and real-time data

automatic scaling, high performance, and ease of application development. It provides powerful querying and real-time data synchronization capabilities, making it ideal for web and mobile applications that require a responsive and dynamic user experience. Firestore also integrates well with other Firebase features, enhancing its suitability for developing web and mobile applications.
