EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 109 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 109

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization wants to use multiple marketing datasets to forecast user acquisition.

How should they use cloud technology to gain new insights from the data?

- A. Import the datasets into a custom data warehouse, and then archive old data
- B. Import and selectively archive the datasets in a custom data lake
- C. Separate the datasets and make predictions using machine learning
- D. Combine the datasets and make predictions using machine learning

Machine learning uses a test dataset to create the model and a validation dataset to test it. Combining them first makes sense if you then stipulate the validation dataset is extracted from the combined set, but in that case why combine them. i voted D.

Selected Answer: D

ML is required for prediction. And ML models work best on large and varied data, so combining them is the best option
