EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 31 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 31

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

Your organization is migrating to Google Cloud. As part of that effort, it needs to move terabytes of data from on-premises file servers to Cloud Storage. Your organization wants the migration process to be automated and to be managed by Google. Your organization has an existing Dedicated Interconnect connection that it wants to use. Which Google Cloud product or feature should your organization use?

- A. Storage Transfer Service
- B. Migrate for Anthos
- C. BigQuery Data Transfer Service
- D. Transfer Appliance

The Storage Transfer Service is a managed service provided by Google Cloud that simplifies the process of transferring data to and from Cloud Storage.

The Storage Transfer Service simplifies the data migration process by automating many of the steps involved. It provides a reliable and scalable solution for migrating large amounts of data from on-premises file servers to Cloud Storage. However, it's important to note that the Storage Transfer Service relies on internet connectivity for data transfer, so consider your network bandwidth and transfer speed requirements when using this service.
