EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 191 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 191

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

An organization with a commissions-based business model is struggling to predict cloud costs due to fluctuating revenue.

How can the organization optimize the use of their cloud resources?

- A. By applying intelligent recommendations
- B. By decentralizing financial decision making
- C. By sharing project ownership across all teams
- D. By increasing their capital expenditure

B is correct. Explanation below:

I'd rule out option A as recommendations help to reduce cost and the given problem is about predicting costs.

On the other hand, the reason for the company to struggle on its cost prediction is the fluctuating revenue, so they need to identify which department are causing this fluctuation, so decentralizing financial decision making can help them on this making the option B the correct one.

Selected Answer: A

A. By applying intelligent recommendations

Intelligent recommendations can help organizations to optimize the use of their cloud resources by identifying and suggesting ways to reduce costs.

Selected Answer: A

Answer = A

Explanation:

Refer the section "recommendations" under cost management

"View intelligent recommendations for optimizing your costs and usage. Easily apply these changes for immediate cost savings and greater efficiency."

Selected Answer: A

The organization can optimize the use of their cloud resources by applying intelligent recommendations. This means using tools and services that can analyze their cloud usage and identify areas where they can save money. For example, they could use a tool that can automatically shut down unused resources or that can move workloads to cheaper regions.

Decentralizing financial decision making, sharing project ownership across all teams, and increasing their capital expenditure would not necessarily help the organization optimize the use of their cloud resources. In fact, these options could make it more difficult to track and manage cloud costs.
