EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 51 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 51

Topic #: 1

[\[All Cloud Digital Leader Questions\]](#)

Your organization wants to optimize its use of Google Cloud's discounts on virtual machine-based workloads. You plan to use 200 CPUs constantly for the next 3 years, and you forecast that spikes of up to 300 CPUs will occur approximately 30% of the time. What should you choose?

- A. 1-year committed use discount for 200 CPUs
- B. 3-year committed use discount for 300 CPUs
- C. 3-year committed use discount for 200 CPUs
- D. Regular pay-as-you-go pricing

What happen with "the spikes of up to 300 CPUs will occur approximately 30%"?
The option C) could cover it?

   upvoted 1 times

  **cookieMr** 1 year, 4 months ago

Selected Answer: C

Based on the provided information, you plan to use 200 CPUs constantly for the next 3 years, which makes it suitable for purchasing Committed Use Discounts. CUDs offer significant cost savings for committing to use specific machine types and sizes for a specified term. By purchasing CUDs for the 200 CPUs that are consistently utilized, you can take advantage of discounted pricing compared to On-Demand rates.

 **EastSideCloudGuy** 2 years, 0 months ago

Selected Answer: C

Please update your site Examtopics.

Answer is C and not D.

D: PayAsYouGo gets no discount, least efficient option!

C: You get a deeper discount for a 3 year commitment (Answer C) vs 1 year commitment (Answer A). See: https://cloud.google.com/compute/vm-instance-pricing#general-purpose_machine_type_family for an example of that.
