EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 40 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 40

Topic #: 1

[All Cloud Digital Leader Questions]

Your organization is moving an application to Google Cloud. As part of that effort, it needs to migrate the application's working database from another cloud provider to Cloud SQL. The database runs on the MySQL engine. The migration must cause minimal disruption to users. Data must be secured while in transit.

Which should your organization use?

- A. BigQuery Data Transfer Service
- B. MySQL batch insert
- C. Database Migration Service
- D. Cloud Composer
