EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 192 DISCUSSION

Actual exam question from Google's Cloud Digital Leader

Question #: 192

Topic #: 1

[All Cloud Digital Leader Questions]

What DevOps practice should an organization use when developing their application to help minimize disruption caused by bugs?

- A. Pause production until all bugs have been eliminated
- B. Prioritize fixing large bugs during production because they are easier to review
- C. Implement small changes incrementally to reduce recovery time when bugs appear
- D. Implement large changes together to make rolling back easier when bugs appear

Selected Answer: C

C is correct

Selected Answer: C

C. Implement small changes incrementally to reduce recovery time when bugs appear

One of the key principles of DevOps is to release changes frequently and in small batches. This helps to reduce the risk of disruption caused by bugs. If a bug is introduced in a small change, it is easier to identify and fix the bug without affecting a large number of users.

Selected Answer: C

C, no doubt
