Cloud Data Loss Prevention (DLP) is a fully managed service that helps you discover, classify, and protect sensitive data, including PII, within your Google Cloud environment. It offers a set of powerful tools and techniques to identify and protect sensitive information, helping you meet data privacy and compliance requirements.

By leveraging Cloud Data Loss Prevention (DLP), your organization can proactively identify, classify, and protect personally identifiable information (PII) within your Google Cloud environment. It helps reduce the risks associated with handling sensitive data, ensuring compliance and data privacy.
