📄 EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 208 DISCUSSION

Actual exam question from Google's Cloud Digital Leader
Question #: 208
Topic #: 1

[All Cloud Digital Leader Questions]

An organization needs to rapidly scale its use of computing resources and honor its commitment to environmental sustainability.

What should the organization do?

- A. Refactor application software to use less energy.
- B. Use a public cloud provider with energy-efficient data centers.
- C. Use a carbon-neutral energy provider for an existing on-premises data center.
- D. Purchase energy-efficient servers for an existing on-premises data center.

B: Energy-Efficient Data Centers: Major public cloud providers invest heavily in optimizing their data centers for energy efficiency and often use renewable energy sources. These companies leverage advanced technologies to reduce power consumption and have the capital to invest in large-scale sustainable energy projects. By using a public cloud provider known for energy-efficient practices, the organization can scale computing resources more flexibly and sustainably compared to maintaining their own data center.
