📄 **EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 182 DISCUSSION**

Actual exam question from Google's Cloud Digital Leader
Question #: 182
Topic #: 1

[All Cloud Digital Leader Questions]

An organization cannot afford to modernize their infrastructure, but they want to process data from their legacy system in a modem platform hosted by a business partner.

What solution should the organization choose to make their data accessible?

  A. Compute Engine

  B. Anthos

  C. An application programming interface

  D. Google Kubernetes Engine

C. An application programming interface

They can expose an API that can be used by their business partner.

C - API to unlock value from legacy system.

👍 ↩ ⚐ upvoted 1 times

👤 **guilhermemls** 1 year, 8 months ago

Answer is C because of API serving as a bridge between legacy and modern systems, just like Haplo46 said.

For me C is correct, the API can act as a bridge between the legacy system and the modern platform, allowing the organization to process data from their legacy system without having to modernize the infrastructure.

Anthos lets you build and deploy modern apps in your data center, retail edge location, factory, stadium. For me B is the answer
