`Selected Answer: B`

B. Measure and track API performance

Apigee is an API management platform that helps organizations design, secure, deploy, monitor, and scale APIs. One of the key functionalities is the ability to measure and track API performance. Apigee provides analytics and monitoring tools that allow organizations to gain insights into how their APIs are being used, track performance metrics, and ensure that APIs are operating efficiently. This helps in optimizing API usage and identifying areas for improvement.

☐ 👤 **cookieMr** 1 year, 4 months ago

`Selected Answer: B`

Apigee provides comprehensive analytics and monitoring capabilities for the organization's APIs. It tracks API usage, performance, and error rates, allowing the organization to gain insights into how their APIs are being utilized. This data helps in making informed decisions, optimizing API performance, and identifying potential issues or bottlenecks.

Selected Answer: B

There are many obivous wrong answers. Please let someone read the comments.

👍 ↩ ⚐ upvoted 4 times

👤 **Jackey0117** 1 year, 9 months ago

Selected Answer: B

Apigee enables organizations to measure and track the performance of their APIs, including traffic, usage, and response time

👍 ↩ ⚐ upvoted 2 times

👤 **Sukanya_R** 1 year, 10 months ago

Monitor and analyze your traffic to gain reliable performance and actionable insights is ta feature quoted for Apigee in GC documentation. B is the right answer . Since API Management it would also track measure and track API performance. Application development speed would be influenced if right APIs are built quickly and managed through Apigee

👍 ↩ ⚐ upvoted 1 times
