📄 **EXAM CLOUD DIGITAL LEADER TOPIC 1 QUESTION 10 DISCUSSION**

Actual exam question from Google's Cloud Digital Leader
Question #: 10
Topic #: 1

[All Cloud Digital Leader Questions]

Your multinational organization has servers running mission-critical workloads on its premises around the world. You want to be able to manage these workloads consistently and centrally, and you want to stop managing infrastructure.
What should your organization do?

A. Migrate the workloads to a public cloud

B. Migrate the workloads to a central office building

C. Migrate the workloads to multiple local co-location facilities

D. Migrate the workloads to multiple local private clouds

`Selected Answer: A`

Kind of a no-brainer because A is the only "cloud" option.

`Selected Answer: A`

A is correct because workload can be move to public cloud otherwise next service which have PII which must be move to private cloud for security purposes..

Why is Option C not convenient as an answer as the company can have many local Private clouds for mission- critical workload...please suggest

👍 ↩ 🏳 upvoted 1 times

⊟ 👤 **RK_MANOJ** **1 year ago**

it involves maintaining and managing infrastructure across multiple locations, which does not align with the goal of avoiding infrastructure management.

You need to know that this test is Google Cloud Digital Leader. I will prefer choose all the answer related to Google Cloud instead of choosing infrastructure that need to manage by user.

A - Cloud is the only option for central mgmt

👍 ↩ 🏳 upvoted 1 times

⊟ 👤 **cookieMr** **1 year, 4 months ago**

`Selected Answer: A`

To centrally manage mission-critical workloads running on servers located around the world and eliminate the need for infrastructure management, your organization should consider adopting a cloud-based solution such as Google Cloud Platform (GCP).

Selected Answer: A

Only cloud offer the solution being asked

    upvoted 1 times

⊟ 👤 **Sunkhat** 2 years, 1 month ago

I thought B as correct answer. Since this refers to mission-critical workloads, I was thinking of centralized ops. However this doesn't say confidential workloads, so in that case A may be the correct answer
