Selected Answer: C

The question asks who is responsible not how it is done

👍 ↩ 🚩 upvoted 11 times

⊟ 👤 **madcloud32** `Most Recent ⊙` **10 months, 1 week ago**

C is correct.
Marked answer A is wrong. A is platform that provides the service. C is one who decides what permissions are needed.

`Selected Answer: C`

C. Their organization's IT team

The organization's IT team is responsible for defining data access policies in Google Cloud. This includes defining who has access to what data and how they can access it.

`Selected Answer: C`

Who? The IT Team.
What Service? IAM

👍 ↩ 🚩 upvoted 2 times

⊟ 👤 **shuvs** **1 year, 11 months ago**

`Selected Answer: C`

Cloud identity is the tool (not 'who'). And end users shouldn't be defining access - security risk.

⊟ 👤 **Alfred_Magno** **2 years ago**

Easy, Who is responsible for defining data access policies?, the key is the first word they use for question, We use the question word "who" when we ask questions about a person.

👍 ↩ 🚩 upvoted 2 times

⊟ 👤 **brainysaki** **2 years ago**

`Selected Answer: A`

IMO answer to these types of questions is always one of the google cloud services, which is why I'm going with Option A which even relates to what has been asked.

👍 ↩ 🚩 upvoted 2 times

⊟ 👤 **ed_per** **1 year, 11 months ago**

If they meant "Which service" they'd have used that language.

👍 ↩ 🚩 upvoted 1 times

⊟ 👤 **jaxclain** **2 years, 1 month ago**

`Selected Answer: C`

The only right answer here is C, those who think is Cloud Identity are wrong, remember that if having CI is optional so either way the one who is responsible for defining data access policies is always the Orgs IT team.

Its A - Cloud Identity and Access Management (IAM) helps customers to define fine-grained access policies and precisely control access to Google Cloud-hosted data.

👍 ↩ 🚩 upvoted 2 times

⊟ 👤 **AwesomeGCP** **2 years, 1 month ago**

C - Cloud Identity and Access Management (IAM) helps customers to define fine-grained access policies and precisely control access to Google Cloud-hosted data.

⊟ 👤 **dianprat** **2 years, 1 month ago**

The question is "Who" not how or what. so answer A is wrong, (and definitely not B). So either C and D. "End users" seems low level end users (not management). so C should be correct

low level end users (not management). so C should be correct

👍 ↩ ⚑ upvoted 3 times

⊟ 👤 **Sbgani** 2 years, 1 month ago

Selected Answer: A

Cloud Identity and Access Management (IAM) helps customers to define fine-grained access policies and precisely control access to Google Cloud-hosted data.

👍 ↩ ⚑ upvoted 1 times

⊟ 👤 **ed_per** 1 year, 11 months ago

Yes, but who defines the policies which are then implemented in IAM?

👍 ↩ ⚑ upvoted 1 times

⊟ 👤 **soumik4u** 2 years, 1 month ago

The term is using in the question Google Cloud Data.........we have to perform the task using Cloud Identity option A....................if the term Google Cloud Data is not mentioned in the questions then we can go for the option C.

👍 ↩ ⚑ upvoted 1 times

⊟ 👤 **SomeshSule** 2 years, 1 month ago

It ultimately depends on end user requirements. Who wants to access what data is defined by end user needs.

👍 ↩ ⚑ upvoted 1 times

⊟ 👤 **jexmtropicscheatchatya** 2 years, 1 month ago

Selected Answer: C

C. Their organization's IT team
