Oddly D could be right. to transform is a culture change, which requires true collaboration instead of just lip service to it. investing in physically co-locating stakeholders would help shift the culture

investing in physically co-locating stakeholders would help shift the culture.

Selected Answer: A

A. Increase top-down visibility and foster a culture of blamelessness.

To move from a tactical cloud adoption approach to a transformational approach, an organization needs to change the way it leads the organization. This includes increasing top-down visibility and fostering a culture of blamelessness.

Top-down visibility means that leaders need to communicate the organization's cloud strategy and goals clearly and often. They need to explain why the organization is moving to the cloud and the benefits that it will bring.

Selected Answer: B

If your objective is to innovate with net new applications that solve new business problems (i.e., transformational) then we recommend taking the greenfield software development approach.
